

Tallinn MTBO Camp 2026 – Information

Training types and locations:

02.04 Training: Long Sprint + Line-Orienteering (**Mustamäe**) 59.392595, 24.680034

03.04 "**Camp Cup - Middle**" (**Männiku**) 59.365780, 24.709265

03.04 Training: Shortened Long-distance (**Keila-Joa - Vääna-Jõesuu**) 59.396040, 24.298830

04.04 "**Camp Cup - 2 x Sprint**" (**Pirita**) 59.467075, 24.863579

04.04 Training: Shortened Long-distance (**Järve - Raudalu**) 59.401829, 24.731837

05.04 "**Camp Cup - Mass-start**" (**Kaberneeme**) 59.509001, 25.272906

05.04 Training: Shortened Long-distance (**Harku - Astangu**) 59.386416, 24.629233

06.04 "**Camp Cup - Sprint-Relay**" (**Merimetsa**) 59.434975, 24.684265

In the morning-trainings „Camp Cup“ start is open 10.00-11.00, finish is open until 13.00. In the afternoon-trainings start is open 15.30-16.30, finish until 18.30! 02.04 – start is open 18-19, finish until 20.30. (Maps are given to participants at the start.)

Organizers and course-setters notes:

This spring has been surprisingly good and warm also in Estonia and there is no snow and ice in the roads and tracks. Due to that afternoon trainings could be a little bit longer than last time when we had training camp in Tallinn (2022 and 2023).

As MTBO training camp takes place close or in the urban areas there are quite a lot of tracks and paths. Be careful when riding on open roads and streets – traffic could be not very active, but still open everywhere. Obey traffic rules!

Other dangerous areas – in some places there are high vertical cliffs (in Keila-Joa – Vääna Jõesuu: even up to 30 meters and Mustamäe – Astangu: up to 10-15 meters) where some tracks could be close to them. But please use common sense and stay away from the edges and do not take any unnecessary risks!

All the terrains are generally well mapped for various MTBO events (mostly for Tuesday afternoon mass-events) in recent years, but organizers and course-setters have 'nt been able to re-visit and check all tracks and pathes on all possible route-choices after the winter.

Therefore not all fallen trees, minor changes etc are marked to the map as in high-level elite competitions. (For the morning's training-competitions (Camp Cup's) however the fieldwork has been done more seriously compared to the afternoon-training events.)

After just ended winter some smaller and narrower less used pathes and junctions might be a little bit hard to see or follow in some places – as they could be covered by last years tree-leaves on the ground and there could be also down-bended branches (by the heavy snow) above the pathes.

In the morning training-competitions (Camp Cup's) there is SIAC time-keeping (+Livelox). In the afternoon-trainings there is a Livelox route-recording (with own phones) and only CP-flags in the forest. Please charge Your phones and watches before trainings and use Livelox during the events to have good base to compare routechoises with eachother afterwards.

Good luck, have fun and enjoy Your trainings! ☺

P.S. If You like to enjoy good nature sightseeing, there are some places in training-camp maps where You could see them: 03.04 afternoon training: Keila-Joa Waterfall, bridges and manor park near start-finish area, Türisalu Cliff (thera are some special big parking places) in Keila Joa – Vääna-Jõesuu map, Kaberneeme wild beach near Mass-Start Event area (05.04).
